What is Blue-Flame?

Blue flame heaters work much like a central heating system. They warm the air first, then people and objects. Altogether, the heat is more “gentle” as the warming process occurs. Adding to its beauty, the blue flame glows through tempered, tinted glass for warm, intimate comfort.

What is Infrared?

Infrared plaque heaters radiate heat and “warm like the sun.” Direct heat from the radiant plaques quickly warms people and objects in the room before heating the air. As you enjoy the immediate comfort, the bright orange plaques illuminate a warm, cheery glow.

What is Manual Control?

Manually controlled vent-free heaters allow you to choose the heat setting you prefer by simply turning the control knob. The heater will operate at the selected level until the control knob is turned to off or another setting.

What is Thermostatic Control?

Thermostatically controlled heaters automatically modulate their output in order to maintain the heating level selected. Both blue flame and infrared models are offered with thermostatic controls, though they operate in slightly different ways.

How do Thermostatically Controlled Blue Flame & Infrared Heaters Work?

Blue Flame models operate by gradually modulating the heat output and flame height from the selected setting to lower settings, or pilot, in order to maintain a consistent room temperature. Operating from pilot, thermostatically controlled infrared models turn all the plaques on or off to maintain the heat output desired.

How do I Choose the Proper Size of Heater?

It's easy! First, measure the length and width of the area you wish to heat. Next, calculate square footage (length × width). In the chart below, you'll find the BTU output recommended to heat various spaces.

square feet	up to 200'	up to 400'	up to 600'	up to 900'	up to 1,000'
well insulated	3,000 BTU	6,000 BTU	9,000 BTU	12,000 BTU	15,000 BTU
average insulation	6,000 BTU	12,000 BTU	18,000 BTU	24,000 BTU	30,000 BTU
no insulation	9,000 BTU	18,000 BTU	27,000 BTU	36,000 BTU	45,000 BTU

Chart based on ceiling less than 10 feet.

VENT-FREE GAS LOGS

The White Mountain Hearth Log Collection – Flint Hill

2018

Empire Comfort Systems created the White Mountain Hearth collection to give you more options in a gas log set. With several distinct log looks arranging in sizes from 18 to 30 inches, this special collection helps you tailor your hearth's look to top off any room decor.

Manual and Thermostat Remote control logs

BEYOND REAL

From the curve of each log to the height of the stack, our White Mountain Hearth log sets are crafted to complement the burner pattern and produce lifelike fire. Flames dance and swirl to captivate your imagination and warm your soul.

Ceramic Fiber Gas Log Sets with Vent-Free Burners

Manual Control

18" Model VFDM-18LBN — 28,000 BTU	
Reg. Price \$370.00	Sale Price \$350.00
24" Model VFDM-24LBN — 34,000 BTU	
Reg. Price \$380.00	Sale Price \$360.00
30" Model VFDM-30LBN — 40,000 BTU	
Reg. Price \$405.00	Sale Price \$385.00

Thermostat Only Control

18" Model VFDT-18LBN — 28,000 BTU	
Reg. Price \$369.00	Sale Price \$339.00
24" Model VFDT-24LBN — 34,000 BTU	
Reg. Price \$419.00	Sale Price \$389.00
30" Model VFDT-30LBN — 40,000 BTU	
Reg. Price \$429.00	Sale Price \$399.00

On/Off Remote Control

18" Model VFDR-18LBN — 28,000 BTU	
Reg. Price \$629.00	Sale Price \$609.00
30" Model VFDR-30LBN — 40,000 BTU	
Reg. Price \$649.00	Sale Price \$629.00

Imagine the Difference...
No Hauling Wood • No Kindling No Ashes • No Dirty Hands

Minimum Firebox Dimensions

Log Size	Height	Depth	Front Width	Rear Width at 13" depth
18"	17"	13"	24"	20"
24"	17"	13"	28"	21"
30"	17"	13"	34"	24"
